

GLIDER ROCKER

Designed specifically for Health Care use, this glider rocker is available with your choice of quality vinyls from C. F. Stinson or Crypton, which have a moisture barrier, which makes for easy clean up if you have a spill. Cushions are easily removable for cleaning.

Internal precision bearings have been vigorously tested for 7,000,000 cycles with 350 pounds, and the custom designed bearing holder is designed to eliminate any pinch points. The bearings have a lifetime guarantee.

A unique horizontal foot stabilizer prevents our Glider from tipping sideways and all wood plugs have been removed to prevent chocking hazards.

An optional side locking mechanism locks the glider so that entering and exiting the Glider is easier, a second lock in the back of the glider over-rides the side lock for complete safety and control.

The Glider meets both Cal. 117 and Cal. 133 requirements.

The Glider comes in oak with your choice of natural, cherry, harvest or golden oak stains or maple with natural, cherry, harvest, or maple Stains. .

Optional arm pads are also available.
