

**Homewood Healthcare, the customer choice for quality furnishings used in L&D,
NICU, and Mother/Baby**

www.homewoodhealthcare.com

Homewood has been in business since 1990 with the advent of LDR's and LDRP's in the marketplace. Homewood's first product was the wood bassinet which they have now sold over 13,000.

Since 1990, Homewood has become more of a custom design company for wood products in the L&D/NICU environment. We work with the hospital, architects, and interior designers to develop distinctive furnishings to accommodate your needs.

Besides being able to customize to fit your needs, some of the key design features that make Homewood stand out from the competition:

- Use only solid **Grade A** architectural woods.
- **Book match veneers** so that all wood grains match.
- **Apply stain by hand** to assure deep penetration.
- Top coat of catalytic conversion varnish that bonds to the wood for **life-long durability**.
- All drawers have **heavy duty**, full-extension, self-locking hardware rated for 100 lbs.
- Absolutely **NO** particle board or edge tape used on products, all **100% hardwood**.
